

## INVESTOR CORNER

Thank you for your investment in NextEra Energy, Inc. Your company remains focused on building long-term value for shareholders by investing in energy technologies that are designed to provide affordable, clean and reliable power to our customers for years to come. We completed a strong year last year, and have set ambitious goals for 2014. We are pleased to give you an update on several recent accomplishments.

### Stock Certificate Holders

Certificate holders should consider depositing their stock certificates into their accounts at our transfer agent, Computershare, to avoid the cost of replacement due to loss, theft or destruction. Certificates, along with a letter of instruction to deposit the certificate into DRS book entry, should be sent via insured mail to NextEra Energy, Inc., c/o Computershare, 250 Royall St., Canton, MA 02021. Computershare will send you a confirmation of the deposit. You may also deposit your certificates into your brokerage account. See your broker for instructions.

### Direct Deposits

We encourage shareholders who receive their dividends by check to enroll in direct deposit.

Once enrolled, your dividend payment will be deposited into your bank account on each dividend payment date. Visit [Computershare.com/NEE](http://Computershare.com/NEE) to enroll online, or call 1-888-218-4392 for an authorization form.

This newsletter contains forward-looking statements that are subject to various risks and uncertainties. Discussion of factors that could cause actual results to differ materially from management's projections, forecasts and estimates are detailed in the company's most recent Securities and Exchange Commission filings on Forms 10-Q and 10-K.

### NextEra Energy Dividends Per Share

\* Projected based upon dividend of \$0.725 declared on Feb. 14, 2014, for payment on March 17, 2014; dividend declarations are subject to the discretion of the board of directors of NextEra Energy.

## NextEra Energy Reports Strong Results in 2013

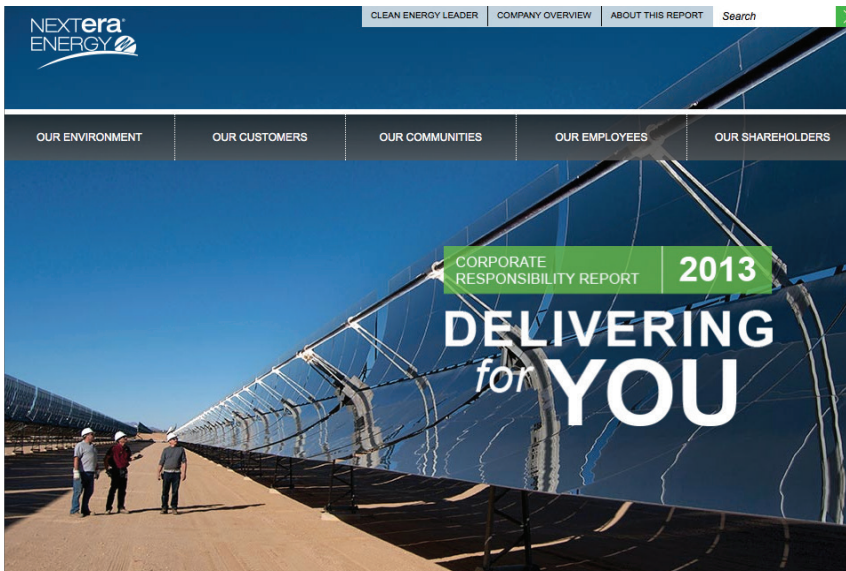

NextEra Energy, Inc. delivered strong financial results in 2013 as all of the company's major businesses continued to execute on the ambitious objectives set for the year, company leaders reported in a Jan. 28, 2014, earnings presentation.

"NextEra Energy delivered solid results to finish the year as we executed well on the goals we set for the company," said NextEra Energy Chairman and Chief Executive Officer James L. Robo. "At FPL, we completed the modernization of our Cape Canaveral facility, accelerated our storm hardening program and strengthened our electric grid, all of which help to provide our customers with greater efficiency and reliability, as well as the lowest typical residential bill in the state. At NextEra Energy Resources, we executed well on our solar construction program and signed more than 1,100 MW of wind power purchase agreements. Across the enterprise, we delivered great operational performance as well as terrific cost performance as we completed a very strong year."

Florida Power & Light Company invested approximately \$2.9 billion in 2013, with approximately \$700 million associated with three modernization projects at Cape Canaveral, Riviera Beach and Port Everglades. FPL successfully completed extended power uprates of its two Florida nuclear facilities. The largest U.S. nuclear upgrade investment in recent history added more than 500 megawatts (MW) of clean, zero-emission generation to the FPL fleet. Also in 2013, the company continued to improve the electric grid through its Energy Smart Florida program, including completing the installation of approximately 4.5 million smart meters across its service territory.

NextEra Energy Resources, LLC continued to execute on its backlog of U.S. and Canadian wind projects, and met milestones for the development of the U.S. solar portfolio. The business also remains focused on further developing the U.S. wind portfolio and securing incremental solar opportunities.

The company's transmission business also continued to grow. The Lone Star Transmission line was commissioned on time and under budget in early 2013. The business also was awarded development rights by the Ontario Energy Board to develop the East-West Tie Line Transmission project with partners Enbridge and Borealis.

NextEra Energy's Corporate Responsibility Report details how the company's growth during the past year has been balanced by a strong commitment to the environment and the communities in which the company operates.

## Corporate Responsibility Report Details Billions in Clean Energy Investment

NextEra Energy's growth over the past year has been balanced by a strong commitment to the environment and the communities in which the company operates, the company's newly released Corporate Responsibility Report shows.

Highlights from the report, released in December 2013, include:

- » Over the past five years, NextEra Energy has upgraded six existing nuclear units, adding approximately 700 MW in net generating capacity; this is roughly the size of a midsize power plant.
- » The company commissioned roughly 1,500 MW of U.S. wind energy in 2012, a milestone no other company has ever achieved.
- » NextEra Energy's emissions rate is far below the industry average. In 2012, nearly 97 percent of power generated by NextEra Energy was from clean or renewable sources, including wind, solar, combined-cycle natural gas and nuclear.
- » NextEra Energy invested nearly \$9.5 billion in capital projects in 2012 alone, creating American jobs and helping communities thrive.

Shareholders are invited to experience the company's completely redesigned Corporate Responsibility Report, available at [NextEraEnergy.com/CRR](http://NextEraEnergy.com/CRR).

## NextEra Energy Resources Subsidiary Brings Mountain View Solar Into Service

NextEra Energy Resources, LLC, announced that its subsidiary, Mountain View Solar, LLC, began commercial operation of its Mountain View Solar Energy Project in January 2014. The 20-MW solar photovoltaic (PV) project is located on approximately 146 acres in the Mountain View Industrial Park in the city of North Las Vegas. All of the power generated by the Mountain View Solar Project is being provided to NV Energy customers under a long-term power purchase agreement.

"We are proud to be a part of an initiative that not only supports NV Energy's renewable energy supply, but has also helped to power Clark County's local economy," said NextEra Energy Resources President and Chief Executive Officer Armando Pimentel.

2013 was another year of growth in the company's solar business, as it placed into service approximately 280 MW of contracted solar generation at its Desert Sunlight and Genesis facilities.

## Celebr-8!

For the eighth consecutive year, NextEra Energy, Inc. is ranked No. 1 on *Fortune* magazine's "Most Admired Companies" list among electric and gas utilities.

## FPL's Customer Metrics Improve Along With Florida's Economy

The Florida economy continues to strengthen, and most of the customer metrics the company tracks are improving, Vice Chairman and Chief Financial Officer Moray Dewhurst said on the Jan. 28, 2014, earnings conference call.

"Overall, Florida's economy is progressing well and poised for further growth," Dewhurst said.

FPL customer metrics improved moderately, he said. During the fourth quarter, the company saw the largest increase of customers since late 2007, with approximately 80,000 more customers than in the comparable quarter of 2012 – an increase of 1.7 percent. The 12-month average of the low-usage percentage has fallen to 8.2 percent, its lowest level since December 2007. The number of inactive accounts has also continued to decline, reaching its lowest level since 2005.

These metrics are consistent with several Florida economic indicators the company tracks. Florida's seasonally adjusted unemployment rate in December was 6.2 percent, which was down once again versus the prior month, down 1.7 percentage points since December 2012 and down 5.2 percentage points from the all-time high of 11.4 percent set nearly four years ago. The number of jobs in Florida was up 192,000 compared to a year earlier, and December was the 41st consecutive month with positive job growth in Florida after more than three years of job losses. Florida's private sector continues to drive the state's job growth, as more than 462,000 private-sector jobs have been added since December 2010.

In addition, the U.S. Census Bureau now estimates that Florida's population increased by more than 230,000 people over the 12-month period that ended July 1, 2013, and many analysts now project that Florida will pass New York as America's third most-populous state sometime in 2014.
