

NextEra Energy is the world's largest generator of renewable energy from the wind and sun. We are ranked No. 21 among the top 57 companies globally that "Change the World" by Fortune 2018.

We're not just an energy company – we are a technology company changing the WORLD.

Technology has changed the way we live and function as a society and will continue to do so. Staying on top of the latest technological advancements is key for every industry. The energy industry is no different. NextEra Energy has been on the forefront of technology, and we are always looking to find new, innovative ways to solve the world's energy challenges:

- » **Smart meters & grid diagnostics** help our team monitor and manage the energy grid leveraging data lake technologies and machine learning.
- » **Autonomous robots** ensure our substations are working effectively and continue to deliver reliable service customers can count on in good weather and bad.
- » **Drones** help us inspect the day-to-day health of the energy grid, as well as accelerate restoration efforts following severe weather and hurricanes.
- » **Augmented reality** hard hats provide crews with important information about the equipment they are handling, eliminating the need to reference paper documents, manuals or computer menus.
